

High-resolution small animal ultrasound imaging

10 - 13 October 2023
Hôpital Cochin Paris

Course overview

The purpose of this training session is to give each participant the key concepts and practice of high-resolution small animal ultrasound imaging in order to become an independent user.

10 -13 October 2023, Paris, France

Who is the course for ?

Biologists, from technician to researcher, in particular in the fields of cardiology, cancerology, developmental biology ; Medical Doctors and physicists.

TARGETED SKILLS

- Understand the principles of ultrasound images acquisition and processing
- Acquire ultrasound images autonomously
- Analyse US data autonomously
- Apply the concepts of US imaging to developmental biology, cardiology, hemodynamics, ...
- Get familiar with current technological evolutions

ENTRY REQUIREMENTS

No specific entry requirements are necessary to attend this training session.

CONTENT

Lectures

- Introduction to ultrasound imaging : parameters, fine-tuning
- Echocardiography
- Hemodynamics
- Advanced ultrasound imaging (contrast ultrasound, elastography, ...)

Demonstrations

- Embryo micro-guided injection
- Contrast ultrasound

Hands-on

- Gestation/development
- Echocardiography
- Abdominal anatomy and tumors
- Hemodynamics
- Data analysis
